Black Dog LED
Attn: Mr. Patrick Weeks

Dear sir,

I want to thank you for the support Black Dog LED has given the new Green Technologies program at Brookside Secondary School. Black Dog LED's genuine interest in helping the students at this provincial youth centre demonstrates a willingness to help young people in need of a hand up at a time in their lives when new interests can lead them in new positive directions. Your Black Dog LED lights will be used in our green room helping introduce the students to the fundamentals of horticulture, and to the exciting developments in the new urban farming that is flourishing in cities around the world. Stimulating interest in a real emerging arena of business will help these young men see new opportunities for employment in an urban setting. By providing us with electrically efficient state of the art technology we are able to model purchasing that is environmentally responsible.

Already we have made arrangements to provide some food to the food services at the institution and to the hospitality course in the school. Much of the food cooked in the hospitality course makes its way to shelters for people in need in our community. I know it will please all of you at Black Dog LED and the helpful people at Hydro-Lite in Edmonton, Alberta that your support and generosity has resulted in such positive programs for youth.

Thank you,

Jim Daignault
Teacher
Kawartha Pine Ridge District School Board
